### HBCH SUMMER FORUM

#### Unlocking the Power of Primary Care

A Strategic Approach to Health Benefits Design

# SPONSOR PROSPECTUS

Employers seek innovative ways to optimize plan member health, reduce overall costs, and provide benefits that employees care about and want to use. Despite all efforts, employer healthcare costs and premiums continue to rise and negatively impact businesses and their employees. A major contributor to unsustainable costs is the way most employers purchase health care - wide-open networks without a strategy to integrate, coordinate care, and demand accountability for health and cost outcomes.

New primary care models have emerged as game-changers and the results speak for themselves. This forum will delve into the key elements of designing and implementing a successful primary care strategy, offering employers and health plan leaders the options and tools needed to achieve better health outcomes, lower costs, and enhanced employee satisfaction. The forum will uniquely present an array of primary care strategies, delivery, purchasing options, and change management approaches.

The forum will focus on three key areas:

## **Understanding the Key Tenets of a Primary Care Strategy:**

- Explore the foundational principles of primary care, including patient access, care coordination, and comprehensive care delivery.
- Discuss the importance of primary care as the central pillar of a health benefits strategy and how it can contribute to improved overall health outcomes.

## **Choosing the Right Primary Care Partner:**

- Understand the types of primary care models and determine which fits best for different organizations.
- Key considerations for evaluating and selecting a primary care partner based on organizational goals and workforce needs.

## **Increasing Employee Engagement and Satisfaction:**

- Discover strategies for encouraging employee participation in primary care options, enhancing patient-provider relationships, and improving overall patient satisfaction.
- Explore innovative ways to increase engagement, from financial incentives to personalized care initiatives.

# SPONSOR PROSPECTUS

**Patrick Neilli**  
**CEO & Founder**

Aligned

Patrick Nelli, CEO and Founder of Aligned Marketplace, will set the stage for the day by providing his unique perspective on the past, present, and future role of primary care in employer-sponsored healthcare benefits. Aligned Marketplace engages hundreds of primary care groups, offering a variety of delivery options and connects them with employers across the country under a single contract. While no one size fits all, Patrick will provide a summary of the critical features of a primary care first strategy. He will then serve as the panel moderator for the morning and afternoon general sessions that will dig into the key tenets of a successful primary care strategy. Before Aligned Marketplace, Patrick spent a decade at Health Catalyst (HCAT), a data and analytics company focused on supporting some of the largest healthcare organizations in the country, where he was President and Chief Financial Officer.
