DO YOU KNOW THESE FACTS ABOUT COVID-19 VACCINES?

Myth:

Fact:

Myth:

Fact:

Vaccines can make you sick with COVID-19.

COVID-19 vaccines cannot give you COVID-19 because they do not contain the live virus that causes the disease. COVID-19 vaccines teach our immune systems how to recognize the virus and help fight against it in the future.¹

I can't receive more than one vaccination at the same time.

According to CDC, eligible people may receive more than one vaccine during the same visit. Talk to a healthcare professional or pharmacist about the risks and benefits of getting more than one vaccine in one visit.²

Vaccines can change my DNA.

Vaccines do not change or interact with your DNA in any way.¹

COVID-19 vaccines contain microchips.

COVID-19 vaccines do not contain microchips. Vaccines are developed to fight against disease and are not administered to track your movement.¹

I don't need to get a COVID-19 vaccine because I've already had COVID-19.

According to CDC, COVID-19 vaccines provide a more predictable level of protection than infection alone and can provide added protection for people who have already had COVID-19.1

My next COVID-19 vaccination must be by the same manufacturer (i.e. Pfizer and BioNTech, Moderna, or Novavax).

People ages 12 and older can choose which updated COVID-19 vaccine to receive. In some cases, other considerations should be discussed with a healthcare professional. For people under the age of 12, talk to a healthcare professional.³

Visit covid19pfizer.com for information on COVID-19 and a vaccine option from Pfizer and BioNtech, and to learn how you can help protect yourself and those you take care of.
